Summary

Product-focused Technical Lead with **5+ years of experience** at the intersection of product development and technical delivery. Gained deep **product-based** exposure in an early-stage startup by owning internal systems supporting lead generation and revenue operations. Currently orchestrating rapid product releases for a US healthcare law firm, directly collaborating with senior managers and stakeholders to **translate complex legal/healthcare requirements** into scalable, data-driven solutions.

SKILLS

Frameworks: React JS, Angular, Tailwindcss, Redux, Material UI, Axios, Rest APIs, GraphQL, JWT, OAuth

Backend: Node JS, Express JS, MySQL, PostgreSQL, Redis, WebSockets, Microservices

Tools : Kubernetes, Docker, Azure, GitHub, CI/CD Pipelines, Postman, Ngnix, Hostinger, Vercel, PuTTY, WinSCP

Languages : Javascript, Typescript, Python

Product & Leadership: Product Strategy, Roadmap Planning, Feature Prioritization, Requirements Gathering (PRD), Stakeholder Management, UI/UX Performance Collaboration, SEO Alignment, User Research, **System design**

WORK EXPERIENCE

Kaizen Que

March 2025 – Present

Software Development Team Lead

Bengaluru, India

- Built AI-powered OCR platform integrating **Gemini APIs** through Node.js backend services to extract handwritten medical reports and store structured healthcare records.
- Architected and delivered an **asset management dashboard** to track more 200+ equipment and analyze costs, vendors, employees data for the company.
- Owned and delivered a development team to launch of **100+ responsive lead-generation** websites in a 3-week sprint, collaborating with UI/UX and implementing SEO-optimized builds

Full Stack Developer

- Solved critical inter-departmental task visibility gaps by designing and launching a **project management system** from scratch, enhancing collaboration and boosting **team productivity by 60%**.
 - Executed product strategy to integrate Google Ads, Facebook, Dailics, Retell, and webhooks to website landers into a **unified CRM**, enabling cost-per-channel analysis, user behavior insights, and targeted campaign optimization, resulted in **200–300 organic leads monthly**.
- Tech Stack Applied:** React, Redux, Python, PostgreSQL, Webhook, Websocket

iFIX Tech Global

March 2022 – February 2025

Associate Software Engineer

Bengaluru, India

- Automated high-volume ticket system with complex data reporting for **2M+ users** via a drag-and-drop builder.
- Solved manual ticket routing process into a single action that could assign over **1,000 tickets** by implementing payload pagination, splitting data into sequential batches to optimize performance.
- Developed a **role-based** government case management portal for citizens and authorities, streamlining over 10K+ annual filings and cutting status inquiries by **40%**.
- Modernized a **legacy system into a configurable platform**, whose flexible feature mapping became a key product to securing **5+ major** enterprise clients within the first year.
- Developed a scalable form platform for an **IIT institutes using Form.io**, replacing static builds with a configurable, schema-based system. **Tools:** Angular, Form.io, Node js, SQL

VEverywhere

Full Stack Developer - Internship (8 months)

November 2020 - June 2021

Bengaluru, India

- Converted **Figma** prototypes into a fully responsive website with React.js, delivering the project independently
- Implemented performance optimization strategies including lazy loading, image optimization, and memoization to significantly improve page speed and reducing page **loading time by 70%**

Tools: React JS, Bootstrap

KEY ACHIEVEMENTS AND CERTIFICATION

Recognized as a Super Nova Consistent Performer - for demonstrating strong ownership, execution excellence, and reliable delivery across complex, cross-functional product and system initiatives.

Become a Product Manager | Learn the Skills Get the Job - Product strategy, Roadmaps, prioritization frameworks, PRDs, stakeholder management

MERN Stack Development - PrepBytes 6 months bootcamp on web development built 5-6 capstone project.

MTA: Microsoft Security Fundamentals (2018) - Microsoft Technology Associate foundational knowledge of security principles, authentication, and system integrity

NELUMBUS TECHNOLOGIES - Machine Learning and Data Science(MLDS)

TECHNICAL EXPERIENCE

IEHP Medical System - Built an OCR system that extracts handwritten medical notes and reports and digitalizes them into a centralized dashboard. **Tools:** React, node js, Gemini Flash 3 model.

Procurement Dashboard - Designed an integrated analytics dashboard that processes uploaded data to calculate and visualize KPIs across quarterly, monthly, and yearly periods for strategic insights. **Tools:** Chart js

EDUCATION

BTL Institute of Management and Engineering (VTU Board)

September 2017 - September 2021

Bachelors Degree in Computer Science and Engineering, **Aggregate/GPA: 7.2**

Bengaluru, India
